

DCC – Dearborn Contracting Company
Dearborn Contracting Company contributing to
FCA’s Big Push in Detroit

Dearborn Contracting Company teaming with Brix Corporation and FCA to deliver
SUV’s built in the Motor City

Dearborn Contracting Company and Brix Corporation, are partnering to complete work at the new, FCA - Mack Avenue complex. This is our first opportunity to serve Brix Corporation as a subcontractor.

The work is part of FCA’s \$1.6 Billion investment in the construction and renovation of the existing Mack I and Mack II facilities that have been serving FCA for decades.

The project is a fast-track project with initial deliveries of materials to be on-site within a week. Work activities include the furnishing and installation of support steel for the new restroom areas, support steel for roof openings necessary for mechanical equipment, embedded bearing

plates, and acoustical metal decking. As noted, initial deliveries will occur almost immediately, with the majority of the work scheduled for October/November of this year.

Project Management duties are being handled by Luay Nseir and field operations are being managed by Tony Lord. We look forward to a long and cooperative relationship with Brix Corporation. Additionally, we are very pleased to be part of this substantial and critical project for Detroit and the Metropolitan Detroit region.
