Walbridge – Toyota Motor Manufacturing Indiana

DCC is very pleased to be working with long-time customer WALBRIDGE on the Princeton, Indiana plant expansion and plant modification for Toyota Motor Manufacturing Indiana. In February, DCC won a contract with Walbridge for concrete foundations, press pit construction, and the concrete components of an 84,000 square foot building expansion. The addition includes both a low-bay portion and a high-bay portion.

Working with Walbridge, a premier General Contractor, and Toyota, one of the finest automakers in the world is an outstanding achievement for our group.

Princeton is located in the southern portion of Indiana, near the Ohio River - which is the boundary line between Indiana and Kentucky.

The contract exceeds \$3.3 million in value and work is to commence at the site in March of this year.
