

DCC – Dearborn Contracting Company

DMW/DCC safety records again stellar in 2018

Recent news – March 29, 2019:

2019 -- EMR = .68

DMW / DCC Safety Results for 2018 are in – and they are exemplary

Earlier this month, the finalized safety statistics for 2018 were made available for publication. The results for the DMW/DCC team are again exemplary. This marks yet another year of excellent EMR, RIR, and Lost Days ratings.

The results are a tribute to the corporate philosophy of “Safety First”. These results come about from excellent supervision in the field and a conscientious focus by office staff. The measures are a positive consequence of the underlying and guiding mindset of driving safe work behaviors and a safe work environment.

As noted, our EMR rating continues to be excellent. The rating of .68 is one of the industry’s best. Over the past several years, EMR / Lost Days / RIR, which are all excellent snapshots of a firm’s safe work habits, are as follows:

	<u>2015</u>	<u>2016</u>	<u>2017</u>	<u>2018</u>	<u>2019</u>
EMR	.86	.72	.65	.73	.68
Lost Day Incident Rate	0.00	0.00	0.00	0.00	0.00
RIR	1.9	0.00	2.7	1.1	.76

As reported by Mark Duxter, our Director of Quality & Safety, 2018 marks the twelfth consecutive year of a DART (Days Away, Restricted, and/or Transferred) rating of Zero.

The statistics are impressive and they are a result of sound management practices, field supervision, and pre-planning activities. We are proud of the results but even more proud that our people are kept safe and our customers reap the benefits of safe and productive work sites.
