DEARBORN CONTRACTING COMPANY

DCC – Dearborn Contracting Company

Spring, Summer, and Fall look busy

Recent news – May 31, 2018:

BALFOUR – Ann Arbor Senior Living

Dearborn Contracting Company is well under way in the field on the new, Balfour – Ann Arbor Senior Living facility at the corner of Main Street and Oakbrook in Ann Arbor, Michigan.

DCC is under contract with Brinkmann Constructors to provide concrete foundations for the development. Though the cool, wet, spring delayed operations - there was a time the site was completely covered with water – we are making strong progress now that dryer, hotter weather has reached Southeast Michigan.

The 146-unit complex is scheduled for completion this coming Fall. DCC superintendent, Robert Flynn is leading the construction efforts in the field.

Third Annual CTC Golf Outing Fundraiser

Dearborn Mid-West Company and Dearborn Contracting Company coordinated the Third Annual CTC Golf Outing Fundraiser earlier this month. The Lakes of Taylor was the venue for the event that raised money to distribute to charitable causes in and around Southeast Michigan.

A total of 24 foursomes participated in the 4-man, best ball, scramble format. Breakfast, Lunch and Dinner was provided to all participants. The day finished with a great list of door prizes, including golf clubs, putters, golf bags, and gift cards.

It was a perfectly day for golf with a cool morning and a warm afternoon. The outing winner was Gala & Associates. Team members included A. Ali, N. Gappy, D. Gappy, and H. El Hage.

General Motors - DHAM

Dearborn Contracting Company recently completed an overhead steel project for General Motors at Detroit-Hamtramck Assembly. The project, for a new harness line, included support steel to support a new, Knight Railing System installation.

Gary Manning and Ryan Langes worked directly with General Motors to complete the project during non-working hours.

The General Motors / DCC relationship is a long and strong one. We are pleased to continue to serve one of the largest automakers in the world.
