Dearborn Contracting Company - again partnering
with White/Braun Construction to serve Ford Motor
Company

Recent news – May 30, 2019:

Dearborn Contracting Company - White/Braun - Ford Motor Company

Dearborn Contracting Company recently secured a second contract with White/Braun Construction for work at Ford's Dearborn campus. Better known as Ford Research and Engineering Center, the campus is undergoing a major reconfiguration and reconstruction of buildings and facilities. Overall, it is said that Ford is investing more than \$1 Billion in improvements over the next 8 years in order to transform the campus into a collaborative and sustainable workplace of the future.

The new work includes concrete driveway and sidewalk removal and replacement at the entry circle to Building 1 on the Dearborn campus. Work is set to begin in late June. This project comes just a few months after the successful completion of the Isolation Pad work for a Fooke Milling Machine project at the same campus location.

We are pleased to have the opportunity to once again serve White/Braun and Ford Motor Company. Gary Manning and Robert Flynn of DCC are leading the Project Management and Field Operations Activities, respectively.
